## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim1-15 are rejected under the judicially created doctrine of double patenting over claim1-3 of U. S. Patent No. 5,918,039 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference is that claims 1-15 of the present application includes a feature of simultaneously maintaining more than one connection between a terminal and a server; while this feature is considered inherent in a windowing environment. That is, the multitasking feature of a windowing environment was

considered one of the major reasons for utilizing a windowing environment over a DOS environment.

Therefore, the feature would have been an obvious addition to the '039 reference to enhance interactions between various systems simultaneously to simplify access and improve response times for the user. The applicant's response provides proof of this via his discussion of his means or step of "maintaining more than one connection between a terminal and a server". Specific attention is hereby requested for the phrase on page 4 of the response that indicates that his invention supports a ***multisession capability, where a user can switch between emulations***. This definition or example clearly supports the features cited in claim 2 of Buswell's reference. Buswell teaches that his system comprises a **first personality...supplied by a first host** and a **second personality...supplied by a second host**; therefore, multiple hosts exists. Now the feature of **switching...and selecting the appropriate one of the first and at least the second personalities** is considered enough to indicate that both are accessible (multisession or multitasking, where a user can switch between emulations). Therefore, the features of the applicant's claims are taught by Buswell and the rejection stands.

3. The obviousness-type double patenting rejection is a judicially established doctrine based upon public policy and is primarily intended to prevent prolongation of the patent term by prohibiting claims in a second patent not patentably distinct from claims in a first patent. In re Vogel, 164 USPQ 619 (CCPA 1970). A timely filed terminal disclaimer in compliance with 37 CFR 1.321 (b) would overcome an actual or provisional rejection

on this ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78 ( d ) .

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

### **Conclusion**

3. Applicant's arguments filed November 26, 2004 have been fully considered but they are not persuasive, for the reasons cited above.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
